+1 (919) 939 – 4399 | kaush4lk@gmail.com

Logical thinker with 3+ years of experience and zeal to learn new things.

Summary

→ Full Stack Developer with wide variety of ability set with focus on **Object-oriented** methodologies, **Frameworks** and **Design Patterns**.
→ Hands on experience in using **Java 8** features like **Streams, Lambda's and Functional Interfaces.**
→ Experienced in developing Single page app using **Angular** and **ReactJS.**
→ Development experience using **Spring boot, Hibernate** and **MongoDB**.
→ Understanding of server side scripting like Node.js.
→ Worked with build tools like **ANT, Maven** and **Gradle** for developing and deploying an application.
→ Proficient using version control such as **SVN** and **GIT**.
→ Strong in **Data structures** and **algorithms** and optimizing system for better performance and run time.
→ Excellent **Team player**, **self-starter** and good at **multi-tasking** with ability to work in fast paced environments.
→ Hands on working experience in cloud technologies like **AWS,** Hadoop **Mapreduce** and **Apache Spark**

SKILLS

Programming Languages	**Java, Python,** Kotlin
Scripting Language	**Linux / Unix, Bash, PHP**
Web Development	**HTML5, JavaScript, Babel, TypeScript, Bootstrap,**
Database	**SQL - IBM DB2, MySQL, SimpleDB, NOSQL- MongoDB, FireBase**
Web Services	**JSON, XML, Firebase, REST**, AWS
Framework	**Angular JS, ReactJS, Spark, Spring Boot, Curam,** Ionic, NodeJS
Version Control	**GIT, Tortoise SVN**
Tools	**Eclipse, Atom, Anaconda, NetBeans, Trello, Android Studio**, **VSCode,** MySQL Workbench
Big Data	**HDFS, Hadoop, MapReduce, Spark**

WORK EXPERIENCE

Software Engineer – Cerner Corporation   *August 2018 – Present*
Languages used : Java, Ruby, Git
→ *Implemented new functionality using proper technology based on the client requirement.*
→ *Underwent and intensive training and learned a lot about the development process.*
→ *Worked in an **Agile** environment and helped the team proactively.*

Programmer Analyst - ESYSTEMS INC   **August 2017 – August 2018**
Technologies used : Java, ReactJS, XML, DB2, Jenkins, Curam Framework
→ *Implement logic and functionality based on the user requirement while maintaining the **documentation**.*
→ *Designed, developed and tested new monthly batches in **Curam** which updated the required evidences.*
→ *Was part of developing the rules that are needed for calculating the eligibility of a person basing on evidence.*
→ *Developing a notice framework using **Java 8** which significantly improved the number of notices created.*
→ *Interacting with client to understand the needs their needs and customize the features necessarily.*
→ *Developed certain screens using **ReactJS** and **REST API** while handling the session using **state management.***
→ *Helped in product deployment using **Jenkins** and also part of fixing the bugs.*

Android Developer Intern (Android Studio, JAVA)
Technologies used : Java, Android SDK, XML
→ *Learned the basics of the **Android** app development and understood the features of the **Android SDK***
→ *Implemented an app to implement all the available android features and learn the functionalities.*
→ *Developed a unique ID based messaging application which stored the messages in **FireBase** and gave users the ability to delete and sent messages and modify the messages after sending.*
→ *Developed a team project and presented it to publish.*
→ *Was also an active helper and helped people learn the given assignment.*

EDUCATION

UNC at Charlotte – (MS) – Computer Science	Jan 2016 – May 2017	**GPA: 3.6**
SRM University – (B.Tech) – Information Technology	June 2011 – April 2015	**CGPA: 3.7**

COURSE WORK

Systems integration, Algorithms and Data Structure, Cloud Computing for Data analysis, Mobile application development, Network based application development, Database Systems, Visual Analytics.

ABILITIES

Ability to learn and adapt quickly, Analytical Thinking, Critical thinking, Detail oriented, Problem-solving skills, Team worker
